

## **Solar Collectors and Systems**

This area is the main strength of the laboratory, which has been for years regarded as the main reference point by all solar product manufacturers in Greece when it comes to testing recently developed products and obtaining expert advice. Tests performed are as follows :

- Solar Collectors - Thermal Performance (ISO 9806-1 & EN 12975-2) and Qualification Tests (ISO 9806-2 & EN 12796-2)
- Solar Domestic Systems (ISO 9459-2 & EN 12976-2)
- Optical Properties of Solar Materials {Emittance, absorptance , transmittance)
